JUVENILE DETENTION PROFILE SURVEY

EXPLANATION OF RESULTS

The following link titles contain the Juvenile Detention Profile Survey results for the Second Quarter of 2005. <u>Capacity, Population and ADP Breakout</u> contains totals for major categories such as Highest One-Day Population, Average Daily Population (ADP), gender, and the age range of detained minors. <u>Breakout of Juveniles in Detention</u> contains information regarding counties' ADP and Board Rated Capacity (BRC) breakouts and <u>Summary of Survey Results</u> contains information about a wide range of juvenile detention facility issues including crowding, mental health needs, average length of stay, and number of bookings.

<u>Juvenile Hall Data – Part 1 & 2, and Camp Data</u> contain trend information compiled from 1999 through 2005. The trend data is separated into Juvenile Hall related data and Camp related data.

Please keep the following in mind when reviewing this information:

- For Overall Capacity, Crowding (highest one-day population-the count of minors in detention on the day of each county's highest population) and ADP (the average daily detention population for the reporting period), we have complete data from all jurisdictions in the state that operate juvenile detention facilities.
- Each jurisdiction provides us with the average population, computed across all the days in the month, for each of the three months in the quarter. The weighted average across the three months is then computed for each jurisdiction (with the monthly averages weighted by the number of days in the month). The jurisdictions ADPs are then summed to produce the state's total ADP.
- For some variables (other than ADP), we did not receive complete data from all jurisdictions. In such instances, we used statistical procedures to estimate the statewide total.
- Felony/misdemeanor, gender counts, and age-range breakouts are based upon a one-day snapshot (on the 15th day of the final month of the quarter). These values are used to determine the percentage of the population in each felony/misdemeanor, gender, and age category. The percentages are then applied to the Total ADP to project the expected ADP in each of the felony/misdemeanor, gender, and age-range categories.

California Board of Corrections Juvenile Detention Profile Survey - 2nd Quarter, 2005 Overall Capacity, Population and ADI

Second Quarter Report, 2005 - Juvenile Hall Data

Board Rated Capacity BRC and ADP for Juvenile Halls

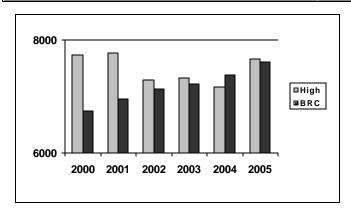

The Average Daily Population (ADP) for juvenile halls increased to 7,006 in the 2nd Quarter of 2005. This represents a nine percent increase from 2003-2004 levels.

| Summary of Juvenile Hall ADP | | | | | | |
|------------------------------|-------|-------|-------|-------|--|--|
| 2000 2001 2002 2003 2004 | | | | | | |
| 7,108 | 6,984 | 6,580 | 6,454 | 6,459 | | |

Instructions for Interpreting the Survey Report

<u>Capacity, Population and ADP Breakout</u> is designed to present the Juvenile Detention Profile Survey results for the major reporting categories.

- Capacity: this category presents the Board Rated Capacity (BRC) in terms of the number of beds in juvenile halls and camps/ranches that meet the Board of Corrections (BOC) Standards.
- **High One-Day:** each jurisdiction reports for each month in the quarter, the juvenile hall and camp/ranch populations that, together, constituted the highest one-day count of the month.
- Other: this category refers to the sum of all juveniles who are receiving custody credit while on home supervision with or without electronic monitoring, or in alternative confinement programs.

Breakout of Juveniles in Detention is designed to present County-specific counts.

• **County-specific counts:** this page identifies the ADP for each county and the percent that county contributes to the total state juvenile detention population. The counties are ranked in descending order based on their percentage of the overall juvenile detention population in the state.

<u>Summary of Survey Results</u> is designed to present all the remaining Juvenile Detention Profile Survey results not already listed.

- **One-Day Snapshot**: the percentages in this section are percentages of the total ADP for juvenile halls, camps/ranches, and other juveniles in the system.
- Average number of days that one or more facilities in a county exceeded the Board Rated Capacity: this value is the result of taking all of the counties "number of days of crowding" and averaging the figures submitted by all the jurisdictions. If a jurisdiction had no crowding days, that jurisdiction was not included in the computation. In other words, the value presented indicates the typical number of crowding days per month experienced by jurisdictions that have had one or more days of crowding in the Second Quarter of 2005.
- Average Length of Stay: these numbers are averages for all juveniles in each category: 1) "juvenile hall (all releases)" is computed by first taking the mean length of stay for all juveniles released from juvenile halls in a jurisdiction. Next, all the jurisdictions' means are averaged to produce a statewide figure; 2) "juvenile hall to camps/ranches" is computed in the same fashion, but includes only those juveniles released from juvenile hall and placed in a camp or ranch; 3) "juvenile hall to other out-of-home placements" presents the average length of stay for that subset of juveniles.
